SUMMARY

Full-stack engineer with 2+ years of production experience at CircleChess across web, mobile, and backend, with a strong focus on performance and monitoring. Outside work, built and shipped products solo, including a B2B omnichannel customer service platform and a delivery app live on the Play Store.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, HTML, CSS

Frontend & Mobile: React, Next.js (SSR/SSG), React Native, Expo, Zustand, TanStack Query, Tailwind CSS

Backend & Data: Django, FastAPI, Node.js, REST APIs, Celery, JWT auth, PostgreSQL, MongoDB, Redis, Firebase

Cloud & DevOps: AWS S3 & CloudFront (asset hosting, CDN caching), CI/CD, Vercel, Git, Linux

Product & Quality: PostHog A/B testing, GlitchTip monitoring, Lighthouse/Core Web Vitals, technical SEO, LLM APIs (Groq)

EXPERIENCE

CircleChess | Software Developer

Jun 2024 – Present

Chess learning platform (web, Android, iOS) | Bengaluru

- Rebuilt the Tournaments page in Next.js (moved off React Native) with SSR and Redis caching, taking its Lighthouse performance score from **30 to 90** and SEO score to **99**.
- Worked on moving static assets to S3 with CloudFront delivery for faster page loads, and added automated cache invalidation to the deploy process so releases don't serve stale files.
- Owned the post-class feedback system end to end: scoped it with the coaching team, built the Django REST APIs and WhatsApp Flows integration, tested and shipped it. Structured feedback collection rose **40%**.
- Built A/B testing with PostHog and Next.js; an admin dashboard swaps S3-hosted variant configs in **under 60 seconds** with no redeploy.
- Replaced Sentry with self-hosted GlitchTip across the Next.js and React Native apps. Alerts surfaced **40+** production bugs, MTTR dropped **45%**, and the paid monitoring bill went to zero.
- Shipped Beginner's Mode, pairing low-rated players with matching bots (~**50%** higher retention), and push notifications for iOS and Android (**+20%** return visits).
- Added multi-puzzle support and a real-time move indicator to Assignments using chess.js and FEN/PGN handling, raising puzzle completion **40%** and cutting drop-offs **35%**.

PROJECTS

Connect | B2B Omnichannel Customer Service Platform

2026

- Designed and built solo: businesses manage customer conversations across WhatsApp, Instagram, email, and calls, and run campaigns, from one workspace.

PickHere | Neighbourhood Delivery App

2026

React Native · REST APIs · WhatsApp chatbot · Push notifications

- Built solo and shipped to the Play Store: mobile app, WhatsApp chatbot backend for service requests, and admin dashboard for delivery ops; order handling time fell **30%**.

IntentRadar | B2B Lead Generation SaaS

2026

Next.js · FastAPI · PostgreSQL · Celery · Redis · Groq LLM · Razorpay

- Multi-tenant SaaS that scans Hacker News, Stack Overflow, GitHub, and Reddit, using LLMs to score **500+ posts/day** for buyer intent and draft outreach.
- Celery + Redis pipeline runs every 15 minutes and delivers leads to 4 channels in under 60s. Razorpay billing across 4 tiers, org-scoped API keys, and 3-role RBAC.

BuildNApply | Resume & ATS Platform

2026

- FastAPI + React app with JWT auth and PostgreSQL that scores resumes (PDF, DOCX, TXT) against job descriptions, flags keyword gaps, and aggregates jobs from 5+ sources into a Kanban tracker.

EDUCATION

B.Tech, Electrical Engineering | Ramgarh Engineering College, Jharkhand | CGPA 7.75/10

2020 – 2024
